

USE ONLY VAN ALSTINE BLADES

MADE IN USA

• **TAPERED** for cutting ease

• **HONED** for maximum sharpness

Why the VAN ALSTINE Design Is Superior

The unique design of the Van Alstine blade includes a tapered shape making the blade wider near the top where strength is needed and thinner at the bottom, greatly reducing drag as the blade cuts through the rubber. The highly finished cutting edge combined with the tapered design results in a blade that cuts cooler and is unmatched in performance and durability.

Blade sizes correspond to thirty-seconds of an inch in width. A #6GF blade cuts 6/32" wide and has a flat bottom. A #6GR blade cuts 6/32" wide and has a round bottom.

Blades are commonly available in the following sizes:

Flat Bottom (GF) 3 4 5 6 7 8 10 12 14 16

Round Bottom (GR) 1 2 3 4 5 6 7 8 10 12

Heavy Duty Flat Bottom (HGF) 16 18 20 24 28 32

Other blade sizes may be ordered as specials.
